About Me

I'm an energetic, diligent, and hard-working creative with a background in contemporary art and digital media production. I enjoy pushing myself to build dynamic, clean code for beautiful, responsive websites and apps. I pride myself on my strong work ethic and enjoy working in collaborative environments with a passionate team. When I'm not coding, you can find me drawing inspiration from an eclectic range of sources from arthouse cinema to internet memes.

My Skills

- HTML5
- CSS3
- Sass
- JavaScript
- jQuery
- Ajax & REST API
- React JS
- Firebase
- Gulp
- Sublime Text
- Adobe Creative Suites (Photoshop, Illustrator, Premiere)
- Version control using Git
- Responsive design
- Pair programming

My Education

HackerYou // Web Development Immersive // June 2017

Nine-week full-time program taught by professional developers, during which students learn all the skills needed to become junior web developers.

Concordia University // BFA Intermedia/Cyberarts // 2007 – 2011

Major in Intermedia/Cyberarts. Focus in digital media production, design for web and print, video editing.

My Related Experience

Artspace // Media Arts Coordinator // 2012 – 2015

- o Developed and designed web, social media, and print promotional materials including websites and email templates
- o Worked with a small team to run all aspects of a medium-sized art gallery in Peterborough, Ontario where I served as project manager to coordinate media art events and exhibitions

House9design // Assistant Designer // 2011 – 2012

- o Created and updated visually dynamic print and web documents
- o Adapted to personalized design needs of clients on a project-to-project basis
- o Edited photo and video content

Averna Technologies // Data Entry Clerk // 2009

- o Interned for the marketing management team
- o Organized the Customer Relationship Management system (CRM)
- o Implemented data integrity strategies for customer support
